The C programming language is a general-purpose and high-level language that facilitates structured programming. C was later on chosen as a system development language because it generates code that executes almost as quickly as an assembly language code. It follows a top-down approach in solving a problem and supports modular programming, which allows developers to break down the code into smaller, reusable components.

The C programming language was created by Dennis Ritchie at Bell Labs in 1972 to allow utilities to run on Unix systems. Because C programs are fast, they allow programmers to manually control computer hardware.

C is a widely used programming language that has many advantages. One of the main advantages of C is its efficiency and speed. C is a low-level programming language that provides direct access to memory and hardware, making it ideal for developing system software and other applications that require high performance. C is also a portable language that can be compiled and executed on various operating systems, making it a popular choice for developing cross-platform applications.

One of the main disadvantages of C is its lack of memory management, which can lead to memory leaks and other memory-related issues if not handled properly. Additionally, C can be a difficult language to learn for beginners due to its low-level constructs and lack of built-in abstractions.

- A) <u>Use specific keywords and search operators:</u> Enter specific keywords or phrases related to the information you're looking for. Be concise but descriptive, using terms that capture the essence of your question. Use search operators to narrow down your results. For example, use quotation marks to search for exact phrases ("online marketing") or use a minus sign to remove terms (marketing -online) to filter search results more effectively.
- B) Evaluate sources: After clicking on a link, evaluate the content of the website. Check the credentials of the author, the reliability of information, and whether other reputable sources support it. This will help ensure the accuracy and credibility of the data found.
- B) <u>Choose the Right Search Engine</u>: Select a search engine (e.g., Yandex, Rambler) based on your needs. Different search engines may give different results, so you should choose the one that suits your needs best.
- Γ) Review results: Go through a list of search results. Read titles to see which links may contain the information you need. Pay attention to publication dates to be sure the information is up-to-date.

- 12. Установите правильную последовательность действий, чтобы получить инструкцию по теме "How to analyze data".
- A) <u>Prepare data:</u> Clean and arrange the data so that it is ready for analysis. Remove duplicates, handle missing values and format the data appropriately. This step is crucial to ensure accuracy of your analysis.
- B) <u>Perform analysis:</u> Carry out selected analyses using appropriate software such as Excel or SAS (Data Analysis System). Document the process as you analyze the data to keep track of your methods.
- B) <u>Interpret results:</u> After analyzing data, interpret the findings in the context of your original questions or hypothesis. Summarise key insights and think about how

they apply to the problem you're investigating. Communicate findings effectively through written reports or presentations.

- Γ) Choose analysis methods: Decide which analytical techniques and tools to use for analyzing the data. This might include statistical analysis, visualization, machine learning or qualitative methods depending on your objectives.
- Д) Collect data: Gather relevant data from reliable sources. This may involve surveys, experiments or existing datasets. Ensure that the data is complete and adequate for the analysis that you plan to perform.

4. Изучите содержание писем и заполните таблицу жалобами, которые поступают от представителей разных культур.

Study the following two letters, both written by employees of a British-based international firm. The two employees work together as software developers. Read the letters and underline all the complaints Sakiko had about Edmundo in her letter and all the complaints Edmundo had about Sakiko in his letter. Put the complaints in the correct categories in the chart.

Letter #1

To the Team leader:

I am writing you to tell you of some problems I have been having with the other software developer in the office, Sakiko Fujita. We don't work well together. She seems to depend on me for most all the ideas and decisions. I seem to carry the responsibility all the time.

To give you an example of our tension, I will describe what happened between us today. This morning we were working on the project. I found that I was doing all the work. She didn't contribute to the discussion. When I finally asked her what she thought of my decisions, she hesitated. Then she only said that she thought my work was interesting and she would think about it more. I am very frustrated. She doesn't give me her opinion or ideas. How can I work with someone who doesn't communicate or give feedback? I want to move forward with our work but I can't with her. How can I get her to take on more responsibility?

I know that part of the problem is communication. She doesn't seem to listen to what I am saying. She rarely looks at me when we speak. And she sits so far away. She is a very reserved person. I can't figure out what is going on in her head.

I hope that you can talk to her and get her to be more involved in our work. As things are now, our collaboration is not at all productive.

Sincerely yours,

Edmundo Montaya Reyes

Letter #2

My Dear Friend Noriko,

Hello. How are you? I hope everything is going well.

I am not doing so well. One of my colleagues is very difficult to work with. He seems only to consider himself. He doesn't know how to share work space or work responsibilities.

Part of the problem is that he has difficulty listening carefully to people. When we work together, he rarely asks me for my opinion. He just talks all the time! When I try to offer my opinion, he interrupts me. For example, today we had to make some important changes in the code. He told me what he wanted, and when I tried to say it wasn't the best idea, he just didn't want to listen to me.

I feel a bit uncomfortable with him. He sits very close and looks at me all the time. I try to get some distance between us but he just pushes closer. He doesn't give me room to talk or think. I think his behavior is a little aggressive.

I don't know what to do. Maybe I should ask for a transfer to a different office. It is too hard for us to work together. I don't think we can resolve our differences. Tomorrow I will mention my problem to the team leader. I think she will understand.

Thanks for listening to me and my troubles.

With love,

Sakiko

5. Изучите описание ситуации и ответьте какую ошибку совершил американский бизнесмен.

Context: In the United States, a man and a woman shake hands, as two men or two women do. Either the man or the woman can begin a handshake; often the person with more authority begins the handshake. In South Korean introductions, two men shake hands and two women bow. In an introduction between a man and a woman, they can bow or shake hands. If they shake hands, the woman always starts the handshake. Extending her hand first, she gives the man permission to touch her hand. If a man begins the handshake, he is touching her without her permission. This causes embarrassment.

Situation: An American executive working in South Korea said, "I learned about Korean handshaking customs my first day at work. I had just entered the bank in Seoul where I would have my office. When I was introduced to a female member of my new staff, I naturally extended my hand and shook her hand. She turned deep red. Everyone in the department laughed."

What mistake did the businessman make?

Время выполнения – 20 мин.

Ожидаемый результат:

The businessman was acting as though he were in the United States by extending his hand to Korean woman. He had to let the woman begin the handshake.

6. Изучите описание ситуации и ответьте на вопрос о причине недопонимания.

Context: The length of time that it is acceptable to look directly at someone can also differ from one country to the next. In some cultures, looking someone in the eye is taken as a sign of interest and honesty. In others, however, this can be seen as a sign of disrespect.

Situation: A UK manager reports problems with Japanese staff. "I asked them how the project was going and, of course, not much has been done. I was suspicious when they didn't even look me in the eye", he said.

What do you think caused the misunderstanding?

Время выполнения – 20 мин.

Ожидаемый результат:

The misunderstanding was caused by cultural differences in communication styles, particularly eye contact. In the UK, looking someone in the eye is taken as a sign of interest and honesty. In Japan, this is a sign of disrespect.
